Oly-Ola Edgings Introduces Redesigned Shallow BRIC-EDG™ Paver Restraint

*New Keyhole Cut Design Reduces Kinking, Improves
Bending Radius, Adds Strength and Increases Flexibility*

Villa Park, IL - Oly-Ola Edgings introduces their new redesigned **Shallow Bric-Edg™** "L" shaped paver restraint featuring rounded keyhole cuts. The rounded keyhole cuts reduce kinking, improve bending radius capabilities, add strength and increase flexibility. **Shallow Bric-Edg** measures 1½" deep x 2½" wide and is slightly smaller than other paver restraint styles making it ideal for shallow pavers, patio blocks, slate or flagstone hardscape installations. **Shallow Bric-Edg** is constructed of 100% recycled black vinyl.

"Our new **Shallow Bric-Edg** is easy-to-install. It does not require cutting or snipping, makes a better radius, does not kink, holds hardscape designs securely and is ideal for small depth hardscape materials like slate and flagstone. **Shallow Bric-Edg** is also our most cost effective paver restraint," states Aymie Clayton of Oly-Ola Edgings.

Shallow Bric-Edg is available in either rigid or flexible sections, 15-ft. or 7 1/2 ft. lengths (with a 90 ft. minimum order) and is anchored by non-bending steel stakes that eliminate gapping, frost heave and contractor callbacks.

Oly-Ola also offers landscape contractors a redesigned **Shallow Bric EDG II** featuring their special "no-back-lip" streamlined backside. **Shallow Bric-Edg II** is designed for installers who prefer placing the restraint outside of the paver.

Oly-Ola Edgings offers landscape contractors five paver restraint styles to fit a wide range of paver projects and installation preferences - Bric-Edg™, Bric-EdgII™ Bulldog-Edg™, Shallow Bric-Edg™ and Shallow Bric-Edg II. All Oly-Ola paver restraints are constructed of 100% recycled black vinyl and feature Oly-Ola's innovative "L" shape design, which makes them easy to install, either under or outside of the paver.

Oly-Ola Paver Restraints are safer to install and to use around pedestrians, children and pets than metal, wood or concrete curbing.

Founded over 26 years ago in 1978, Oly-Ola, Edgings, Inc., headquartered in Villa Park, Illinois, USA, produces the most complete line of polyethylene/vinyl edging and paver restraints in the landscape industry. Oly-Ola products are sold exclusively through landscape distribution centers, landscape contractors and architects and independent nursery/garden centers. Oly-Ola products offer a 100% plus guarantee for 15 years including labor, materials and freight costs. Oly-Ola stocks a large inventory to prevent backorders and assure prompt delivery.
