OLY-OLA's **Versatile Multipurpose** **Landscape Edging Product** **SUPER-EDG™**

Villa Park, Illinois - Oly-Ola Edgings, Inc., producer of premium poly/vinyl landscape edging and paver restraint products, announces the availability of their versatile and multi-functional landscape-edging product, **Super-Edg™**. **Super-Edg** features a 6" deep low profile design that makes it ideal for a variety of landscape and maintenance edging applications such as: defining landscape beds, forming and containing creatively shaped logos and landscape designs, edging flowerbeds, maintaining fence bases, and keeping dirt, debris and water off walkways.

Super-Edg combines the safety features of poly/vinyl with the look of metal. **Super-Edg's** heavy-duty, black vinyl construction makes it inherently safe and, unlike steel edging products, does not require protective plastic caps over the edging to make it safe. In addition, **Super-Edg** is more economical than steel or aluminum edging products.

Super-Edg gives landscape projects a neat, clean appearance and provides a nearly invisible landscape-edging border that blends nicely, enhancing, not overpowering, landscape designs. Its flexibility allows it to be easily heated to form designs and logos.

Installed **Super-Edg** saves landscape contractors maintenance time and as it is easy to cut over and around, eliminating the need for hand trimming. **Super-Edg** can also be used effectively to keep stone and mulch in place and it makes an ideal edging for the base of chain link and wood fences. When installed at a fence base, **Super-Edg** can keep animals from digging underneath the fences and its 6" depth provides an effective barrier that inhibits landscape growth.

Super-Edg is easy-to-install. It is secured with specially developed steel anchoring stakes. The steel anchoring stakes feature tapered points that slide through **Super-Edg's** pre-cut slots to easily penetrate the ground for permanent installation.

Founded 25 years ago in 1978, Oly-Ola Edgings, Inc., headquartered in Villa Park, Illinois, USA, produces the most complete line of polyethylene/vinyl edging and paver restraints in the landscape industry. Oly-Ola products are sold exclusively through landscape distribution centers, landscape contractors and architects and independent nursery/garden centers. Oly-Ola products offer a 100% plus guarantee for 15 years including labor, materials and freight costs. Oly-Ola stocks a large inventory to prevent backorders and assure prompt delivery.
