6" X 6"	10 ft	Flexible Rigid

Custom Profiles

Custom heights and widths are available up to 6" and as low as 3". Drainage slots and multi-purpose stake holes are also optional.

Material:

Teco-Edg is made from 100% recycled post-consumer PVC and is 100% recyclable. We add an impact modifier and a UV inhibitor prior to manufacturing to increase strength and resistance to ultraviolet radiation. Our processed material is purchased from a consistent commercial supplier making sure Oly-Ola knows what to expect, and our expectations are high when it comes to choosing a material that will ultimately need to live up to our exceptional guarantee.

STEEL ANCHORING STAKES

Our custom 9.25" bend-resistant steel stakes are sold separately

* 10-12" Landscape spikes may also be used

H-Clips and Caps can be used to join lengths together and are sold separately.

PVC cement can be used for a more permanent connection. With the proper precautions, a heat gun or torch can be used to bend or form Teco-Edg.

Shipping Details 5 pieces per bundle (50 ft)

4" X 4" Weight		6" X 6" Weight	
Flexible:	7.50 lbs/ piece 37.50 lbs/ bundle	Flexible:	11.25 lbs/ piece 56.25 lbs/ bundle
Rigid:	8.75 lbs/ piece 43.75 lbs/ bundle	Rigid:	12.50 lbs/ piece 62.50 lbs/ bundle

Oly-Ola recommends heating Teco-Edg and bending it to form corners. Additionally, corner pieces are available that can be glued or bolted inside the corner joint. Corner pieces are sold separately.
